

Debate Arena : Technical Discussion Event

Description:

Debate Arena is a two-round technical discussion event that challenges participants to articulate their thoughts, defend their viewpoints, and analyze opposing perspectives. The event fosters critical thinking and effective communication on technical topics.

Round Details:

Round 1: Group Discussion

1. **Team Composition:** Each group consists of 6 participants per batch.
2. **Topic Allocation:** Each group will be assigned a specific technical topic for discussion.
3. **Professionalism:** Participants must maintain a professional tone throughout the discussion.
4. **Evaluation:**
 - Judging is **individual**, not group-based.
 - Multiple participants may be selected from the same group.
5. **No Preparation Time:** The discussion begins immediately once the topic is given.
6. **Selection:** Participants with valid and impactful points will advance to Round 2.

Round 2: Pro-Con Analysis

1. **On-the-Spot Topics:** Participants will receive technical topics to analyze on the spot.
 2. **Dynamic Argumentation:** Participants must alternate between pros and cons whenever the buzzer sounds.
 3. **Winner Selection:** The top 3 participants with the most valuable points will be declared winners.
-

Judging Criteria:

Participants will be evaluated based on:

1. **Relevance and Depth:** The significance and thoroughness of their arguments.
2. **Clarity and Effectiveness:** How well they communicate and support their points.
3. **Flexibility:** The ability to switch seamlessly between pros and cons.
4. **Originality:** Unique and impactful insights.
5. **Overall Impact:** The lasting impression of their contributions.
